Summary

I am a solution-driven ICT Software engineering graduate with a strong foundation in full-stack development and a practical approach to problem-solving. I personally enjoy solving complex problems by breaking them down one step at a time, taking planned and structured steps to guarantee a high-quality outcome.

Education

Cape Peninsula University of Technology | Cape Town, CA

Postgraduate Diploma in ICT: Applications Development | *In progress, expected 12/2026*

Advanced Diploma in ICT: Applications Development | *12/2025*

Diploma in ICT: Applications Development | *12/2024*

Higher Certificate in ICT | *12/2020*

Khanyolwethu SS | Cape Town, CA

Matric | *12/2019*

- Module Top Achievement: Computer Application Technology (CAT)

Skills

Languages & Frameworks

- Java, Spring Boot
- Python
- JavaScript, Node.js
- Vue.js, React.js, Next.js

Databases & Tools

- SQL, MySQL, PostgreSQL
- Database Design & Optimization, ERD Tools
- GitHub, Docker (basic)
- Linux/Unix, Office Suite

Experience

BIIC | Cape Town, CA

Software Engineer Intern | *03/2025 - 11/2025*

- Collaborated with team members to innovate and develop new ideas for software projects
- Participated in the whole Software Development Life Cycle (SDLC) process
- Conducted requirements engineering and competitor analysis to inform project decisions
- Emphasized the importance of documentation in project planning and execution
- Evaluated the feasibility and potential value of app development projects before implementation
- Transformed client ideas into functional software solutions

Condor Green | Cape Town, CA

Software Developer Intern | *07/2024 - 12/2024*

- Developed skills in SQL, C, Python, HTML, CSS, Bootstrap, and JavaScript
- Completed the Harvard CS50 course, gaining expertise in fundamental computer science concepts
- Completed a comprehensive SQL and database course on Udemy, enhancing database optimization and query skills

Project Experience

University Research Collaboration Platform

- Built a backend platform using Python and FastAPI to help university researchers collaborate on projects, manage profiles, and share their research work

- Applied clean software design patterns and organised the code into domain, repository, and service layers to keep it easy to maintain and extend
- Set up a CI/CD pipeline with GitHub Actions and wrote 249 automated tests to keep the platform reliable as it grew

Pillar 5 Group IT Ticketing System

- Designed and developed a live, production-ready IT support ticketing system from scratch using React, Node.js, Express, and PostgreSQL
- Implemented robust backend architecture, including role-based access control (RBAC) for administrative and technical dashboards, and a secure user password reset flow
- Packaged updates as versioned, documented releases so the client could easily use each new version

Arts and Craft E-Commerce Website

- Built a full-stack e-commerce application for selling arts and crafts using Java, Spring Boot, and Vue.js
- Designed and implemented features such as product listing, category filtering, and user authentication, improving usability
- Collaborated with a team to integrate frontend and backend, ensuring seamless data flow between components

Scooter Rental Service Application

- Created a Java-based desktop application using Swing, allowing employees and customers to manage scooter rentals
- Implemented account creation, scooter availability display, and rental orders for users, while providing admin functionalities for efficient management
- Solved database connectivity challenges using MySQL, ensuring reliable data access and storage

Certificates

Udemy: Complete SQL and Database Course | CERTIFICATE

Issued: 2024

- Developed expertise in database design, optimization, and advanced SQL queries

High School Subject Achievement Certificate | CERTIFICATE

Issued: 2019

- Recognized for outstanding performance in Computer Applications Technology
